Subject: 4/21 Hunters Pt EJ Meeting: Dan Hirsch presenting + request Navy present re NBC news article

Dear Brent,

Here are some updates and background public documents related to radiation at Hunters Point Naval Shipyard.

Bradley Angel, Executive Director of Greenaction, announced at the 3/16/16 Bayview Hunters Point EJ Task Force meeting that he would like the Thursday, April 21, 2016, monthly meeting to include these items on the agenda:

- Presentation from Dan Hirsch and others from UC Santa Cruz about radiation and the Hunters Point Naval Shipyard
- Navy presentation about the recent NBC news report about radiation at the Shipyard

Here's a link to the NBC article: <http://www.nbcbayarea.com/investigations/Former-Hunters-Point-Worker-Claims-Supervisors-Ordered-Him-to-Hide-Radiation-371723561.html>

As background, Bradley Angel (Greenaction and the EJ Task Force) had requested technical assistance from the UC Santa Cruz Nuclear Policy Program and asked me in January for a link to Shipyard technical documents for them to review. He later asked both the Navy and EPA to schedule a technical meeting with Greenaction and its advisors. Topics include the questions from Dan Hirsch below about the attached "Source Pages" file.

Lily,

Among the technical issues about which we have questions and for which it would be helpful to have your technical people available who can answer questions in those areas are:

1. How the remediation goals for radionuclides were derived.
2. How the risk estimates for specific estimated radiation doses were derived, and how those doses themselves were derived.
3. The standards that have been and are being used to declare materials to be or not be low-level radioactive waste and where these materials have been and are being sent for disposal or recycling.
4. Questions about pre- and post-remediation risk assessments for both chemicals and radionuclides.
5. Numerous questions about status of characterization, environmental impact review, and remediation for different portions of HPBV.
6. Availability of various key documents.

We have some general questions about the above subject areas, but also detailed specific technical questions
